

# Goofy Dracula NFT Project

Goofy Dracula is a unique, hand drawn, NFT collection centred around a goofier, more family friendly, version of Dracula that could excite both adults and the children within themselves, and focuses on utility and long term benefits for the community and it's members.

It differentiates itself by also keeping accurate information regarding the count's family members (that are also included in the collection), his actions and also encompasses traditional elements from his origins.

Only elements that have deep roots in the Transylvanian culture and history, combined with crypto elements were used, so that the NFT collectors and fans of the infamous count Dracula can approach this in a more enjoyable way.

The artwork was created by a local historian, cartoonist and tattoo artist and includes both Dracula's parents, Eupraxia and Vlad "The Devil" or "The Dragon", but also his son, Mihnea "The Evil", and his grandfather Mircea "The Elder".

A total of 10,000 unique NFT's will be sold. Users will be able to get the pieces by minting on the official website (<https://www.GoofyDracula.com>). Those who are able to get on the whitelist, will have at least a 24 hours advantage to get their NFT's before the public sale starts and the mint price will be lower. Also, there will be special benefits provided in the future to the holders that possess the artwork NFT's.

# Goofy Dracula™

## Goofy Dracula NFT Project

The project started from the founders passion towards the origins and real story of count Dracula, growing up in the heart of Transylvania, and began to take shape with the dream of bringing more attention to the Romanian and Transylvanian values, through the legend of Count Dracula.

- It's also an opportunity to help the Transylvanian kids in need, raise awareness, and provide them with better tools and resources for a healthier life and access to better education, by donating a big percentage of the proceeds from the official launch and the future collections and royalties as well.
- This is the first original Dracula origin series, in a traditional Transylvanian style, which is deeply related to Dracula's real legacy. The project is scheduled to be launched on the Solana blockchain this fall, and to say the style is unique and interesting, would be an understatement.

Mystical art giving real hope to the children in need.

## The Story

This Halloween, count Dracula woke up a little late and goofy because he drank a bad batch of blood and didn't wear his mask properly either. So now all the other monsters are making fun of him and making him feel like an outcast!

His mother, Eupraxia "The Witch," was the hardest on him, and when it seemed it couldn't get any worse, his entire family exiled him from the castle! Now, he isn't taking good care of himself all that well and everyone started to notice. Let's face it, his goofy look and smile aren't something anyone expected from him, but there's still time to get his groove back! Let's help our dear Dracula regain his respect and reputation within his family, of the most feared and badass monster of the night!

# The Collection

The Goofy Dracula world is both goofy and mystical and some of the NFT's from the collection will be rarer than others. Each one is programmatically generated from over 120+ unique hand drawn traits ranging from headwear, clothing, weapons, and a lot more. The traits are based on traditional Transylvanian elements and are ranked from "Common" to "Monstrous". Each rank has a particular chance of getting minted according to its rarity.

**The will be a full rarity chart after the reveal, which will happen in 24 hours after the public sale ends.**

# Roadmap and Mission

## Phase 1 Before the mint

Set up a community wallet that will contain 5% of all sales revenue, plus half the royalties that will generate each and every day, from the secondary market. The purpose of the wallet is buying multiple listings at floor price at the end of each week for the foreseeable future, to raise the value of our holders NFT's and offer them through giveaways to the most active members and also support our charity cause.

### Phase 2 Mint time and shortly after

After the mint starts a series of giveaways are starting between 25% and completion, plus some huge surprises for early minters. The first big donation is being made to support children. (See the charity section) One of the main prizes, that consists in a Lamborghini Urus, gets unlocked at 50%. That means someone who managed to mint a Goofy Dracula NFT will receive a new Lamborghini Urus. Also, very rare, collection pieces of art will begin to be airdropped to randomly selected holders too. The biggest prize unlocks after all the NFT's in the collection got to their new owners. One person will win the biggest prize: 2500 SOL directly into their wallet. We'll also start working on more free airdrops for all holders and add more to the Goofy Dracula metaverse. Plus a surprise and unique utility will be revealed!

7 days after the official launch, the 2500 SOL and the Lamborghini Urus winners will be announced and the prizes are sent to the.

All holders will receive a free NFT from the next collection that will represent the evolution of Count Dracula and the meeting with new monsters

### Phase 3 Future work

**Promotional:** Influencers and business partners will be approached for the Goofy Dracula NFT project and future collections and events.

**Launch of \$BATS Token:** Tokenomics written in full detail on our Medium link very soon. Each Goofy Dracula NFT will generate 5 \$BATS tokens each and every day.

**\$BATS burn:** Burning setup which burns a % of the total supply every month for further increase in value.

**Redistribution:** Every transaction involving the \$BATS token means holders earning further rewards, in \$BATS, from redistribution, daily.

**Collections:** The launch of Dracula's Pets - 2nd generation Goofy Dracula NFTs: Only 7,777 NFTs will be available for holders that also have at least 500 \$BATS.

**The launch of Dracula's Children - 3rd generation Goofy Dracula NFTs.**

**Challenges:** Creative and cool challenges and giveaways of \$BATS, ETH and NFTs, exclusive to holders that also have \$BATS in their wallets.

**The Future:** The main focus on the community and the cause - Goofy Dracula is in the hands of the community for more suggestions, ideas and even other collaborations. Everything will be subject to a vote by those who matter most - the NFTs and \$BATS holders

# Charity Work

**Mystical art giving real hope to the children in need.**

A big portion of the proceeds from the project (over 50%), as well as the royalties from after the launch, are going to support children in Transylvania who don't have the necessary resources and means to live a healthy life, or access to proper education, as previously stated. There will be live streams with the actions leading and following these efforts with the community.

To encourage similar initiatives, a discord channel was created just for this purpose, with the most recent activities in this direction already documented. There are also planned events, most of them in Brasov and Bucharest, that have only the sole purpose of raising funds to further help the cause. An entire team was assembled just to plan, schedule and take care of this big part of what the project is all about.

# The Vision

Goofy Dracula wishes to combine great technology and utilities, with the passion towards helping children, and grow a community of likeminded individuals that can focus their efforts with the team's into making education more accessible for them.

After creating the \$BATS token, a portion of the supply is added to the charity fund wallet each day and goes directly to support the kids. The work doesn't stop here, one of the main collections coming up next year will be called Dracula's children and will take the cause to the next level, with more people getting involved and spreading awareness even more

# The Team

We formed this partnership to honour one of our favourite characters growing up. We envisioned this collection different from any other, by placing Dracula in a unique perspective and surrounding him with classic, local and traditional elements. All of us are Transylvanian natives and we also share the love for helping the kids in need.
