

# Goofy™ Dracula

## Goofy Dracula NFT Project

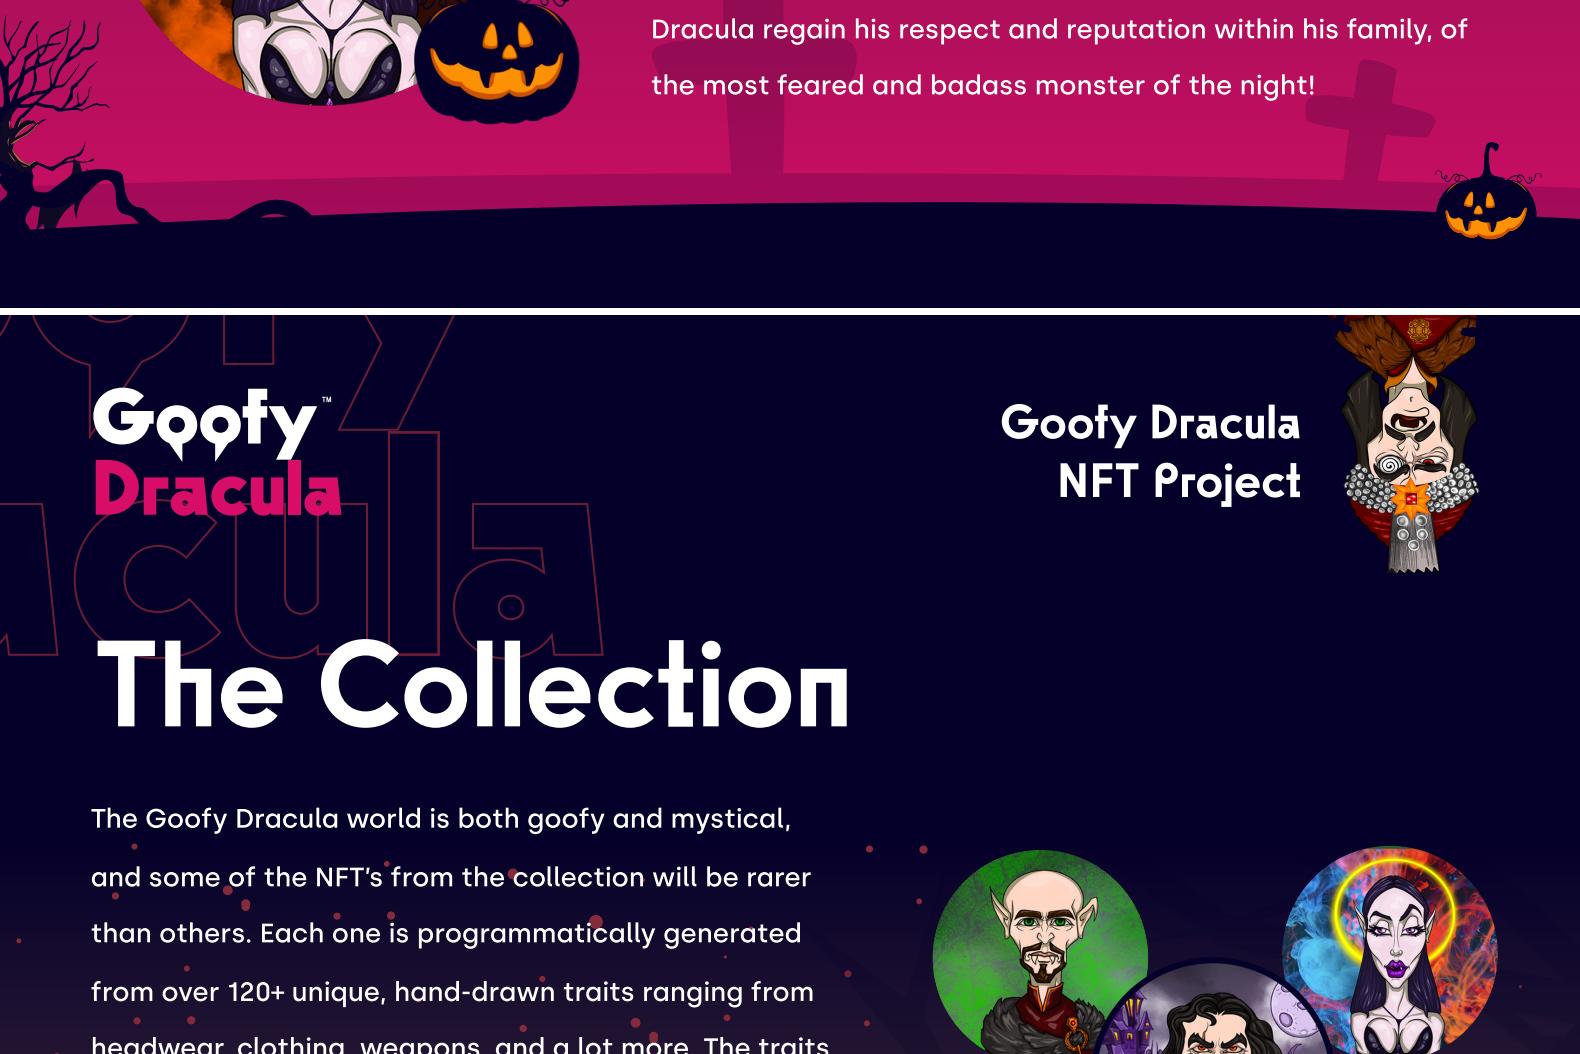

Goofy Dracula is a unique, hand-drawn NFT collection, centred around a goofier, more family friendly version of Dracula, that could excite both adults and the children within themselves, and focuses on utility and long term benefits for the community and its members.

It differentiates itself by also keeping accurate information regarding the count's family members (that are also included in the collection), his actions and also encompasses traditional elements from his origins.

Only elements that have deep roots in the Transylvanian culture and history, combined with crypto elements were used, so that the NFT collectors and fans of the infamous count Dracula can approach this in a more enjoyable way.

The artwork was created by a local historian, cartoonist and tattoo artist and includes both Dracula's parents, Eupraxia and Vlad "The Devil" or "The Dragon", but also his son, Mihnea "The Evil", and his grandfather, Mircea "The Elder".

A total of 10,000 unique NFT's will be sold. Users will be able to get the pieces by minting on the official website (<https://www.GoofyDracula.com>). Those who are able to get on the whitelist, will have at least a 24 hours advantage to get their NFT's before the public sale starts. Also the mint price will be lower for them. There will be special benefits provided in the future to the holders that possess the artwork NFT's.

The project started from the founders passion towards the origins and real story of count Dracula, growing up in the heart of Transylvania, and began to take shape with the dream of bringing more attention to the Romanian and Transylvanian values through the legend of Count Dracula.  
It's also an opportunity to help the Transylvanian kids in need, raise awareness, and provide them with better tools and resources for a healthier life, and access to better education, by donating a big percentage of the proceeds from the official launch and future collections and royalties as well. This is the first original Dracula origin series, in a traditional Transylvanian style, which is deeply related to Dracula's real legacy. The project is scheduled to be launched on the Solana blockchain this fall, and to say the style is unique and interesting would be an understatement.

### Goofy Dracula NFT Project

## The Collection

The Goofy Dracula world is both goofy and mystical, and some of the NFT's from the collection will be rarer than others. Each one is programmatically generated from over 120+ unique, hand-drawn traits ranging from headwear, clothing, weapons, and a lot more. The traits are based on traditional Transylvanian elements, and are ranked from "Common" to "Monstrous". Each rank has a particular chance of getting minted according to its rarity.

There will be a full rarity chart after the reveal, which will happen 24 hours after the public sale ends.

## Roadmap and Mission

### Phase 1 Before the mint

Set up a community wallet that will contain 5% of all sales revenue, plus half the royalties that will be generated each and every day from the secondary market. The purpose of the wallet is buying multiple listings at floor price at the end of each week for the foreseeable future, to raise the value of our holders NFT's and offer them through giveaways to the most active members, and also support our charity cause.

### Phase 2 Mint time and shortly after

After the mint starts, a series of giveaways are starting between 25% and completion, plus some huge surprises for early minters. The first big donation will be made towards supporting children. (See the charity section) One of the main prizes, that consists of a Lamborghini Urus, gets unlocked at 50%. That means someone who managed to mint a Goofy Dracula NFT will receive a new Lamborghini Urus. Also, very rare, collection pieces of art, will begin to be airdropped to randomly selected holders too. The second biggest prize unlocks after all the NFT's in the collection found their way to each new owner.

One person will win 1000 SOL directly into their wallet. We'll also start working on more free airdrops, for all holders, and add more to the Goofy Dracula metaverse. Plus, a surprise and unique utility will be revealed!

7 days after the official launch, the 1000 SOL and the Lamborghini Urus winners will be announced and their prizes sent to them.

All holders with at least 2 Goofy Dracula NFT's will receive a free NFT from the next collection that will represent the evolution of Count Dracula and his adventures with other monsters.

**Promotional:** Influencers and business partners will be approached for the Goofy Dracula NFT project and future collections and events.

**Launch of \$BATS Token:** Tokenomics written in full detail on our Medium link very soon. Each Goofy Dracula NFT will generate 5 \$BATS tokens each and every day.

**\$BATS burn:** Burning setup, which burns a % of the total supply every month, to further increase the value.

**Redistribution:** Every transaction involving the \$BATS token means holders earning further rewards, in \$BATS, from redistribution, daily.

**Collections:** The launch of Dracula's Pets - 2nd generation Goofy Dracula NFTs: Only 7,777 NFTs will be available for holders that also have at least 500 \$BATS.

**The launch of Dracula's Children - 3rd generation Goofy Dracula NFTs.**

**Challenges:** Creative and cool challenges and giveaways of \$BATS, ETH and NFTs, exclusive to holders that also have \$BATS in their wallets.

**The Future:** The main focus is on the community and the cause - Goofy Dracula is in the hands of the community for more suggestions, ideas and even other collaborations. Everything will be subject to a vote by those who matter most - the NFTs and \$BATS holders.

### Phase 3 Future work
